Genex Power

AECOM has been appointed owner's engineer for the construction of the first phase 50MW Solar PV project at Kidston in North Queensland, having already helped Genex Power on the project's development and feasibility since June last year.

AECOM was the owner engineer for the recently commissioned 10MW Sandfire DeGrussa solar power project in Western Australia and was lead designer (civil, structural, electrical and construction support) for the 20MW Royalla solar farm commissioned in 2014 and for the 15MW Sunshine coast solar farm to be

commissioned in 2017.
